

IT Solutions for Government Programs

Phase 1? Light work. Now it's time to actually prove yourself.

Objective

Develop an innovative **mobile app** or **web app** that supports or enhances a government program aimed at improving society. Your solution should leverage IT to address key challenges in areas such as:

- **Free Nutritious Meals:** Help communities access and manage free nutritious food programs efficiently.
- **Illegal Gambling Prevention:** Provide technological solutions to combat and raise awareness about online gambling issues.
- **Smart Farming & Food Security:** Support farmers and consumers with better agricultural practices, supply chain management, or market access.
- **Other Government-Supported Programs:** Any other IT-driven solution that aligns with an existing government initiative.

Requirements

- Choose **either a mobile app or web app** as your solution.
- Clearly define the **problem** and how your app **solves it effectively**.
- Use **modern technologies** for development (e.g., React, Flutter, Node.js, etc.).
- Demonstrate a **working prototype or MVP** that showcases core functionalities.
- Integrating **Artificial Intelligence** into your solution will earn you extra points!
- Provide **proper documentation** (overview, features, tech stack, implementation details).

 **Deadline: March 15, 2025**

Final Presentation

Each team will present their project, demonstrating functionality and discussing implementation details. Be prepared to answer **technical and impact-related questions**.

Judging Criteria

- ✓ Innovation & Relevance
- ✓ Technical Execution
- ✓ User Experience & Design
- ✓ Feasibility & Scalability
- ✓ Presentation Quality

“Every great developer you know got there by solving problems they were unqualified to solve until they actually did it.”

–Patrick McKenzie–
